Receipt is acknowledged of the election filed 11/13/00. The previous restriction has been vacated in view of applicant's arguments. The examiner apologizes for any inconvenience.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 8, drawn to a truss structure, classified in class 52, subclass 493.
- II. Claims 6 and 7, drawn to a die and a method of using a die, classified in class 72, subclass 377.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as to make a generic pipe. See MPEP § 806.05(d).

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially

different process (MPEP § 806.05(f)). In the instant case the flat section of the connection part may be formed by hammering rather than by a die.
